

Q : How to set up the DDNS function of N.MINI?

A : Please follow the followings to configure the DDNS function:

1. Please register a account from a service provider. (For example: www.dyndns.com)
2. Please select the Service Provider, and input the Domain Name ,the User Name/Email, the Password/Key which are registered at the service provider.

Example :

- Select the Service Provider as DynDNS.
- Input the Domain Name as airlive.dyndns.tv
- Input the User Name/Email as airlive
- Input the Password/Key

Dynamic DNS Setting

Dynamic DNS is a service, that provides you with a valid, unchanging, internet domain name (an URL) to go with that (possibly everchanging) IP-address.

Enable DDNS

Service Provider :

Domain Name :

User Name/Email:

Password/Key:

Note:

For TZO, you can have a 30 days free trial [here](#) or manage your TZO account in [control panel](#)

For DynDNS, you can create your DynDNS account [here](#)

3. Pleas click the Apply Change button, and reboot N.MINI to make the change effective.
