

Q. When I want to add SmartCube 300W into AirLive APPCAM app, what should I select “Wired” or “Wireless” in the app?

A. Please select “Wired” no matter your SmartCube 300W connects to Internet by wired or wireless.

The screenshot shows the 'Add Camera' interface in the AirLive APPCAM app. At the top, there is a blue header with the text 'Add Camera' and a white checkmark icon. Below the header, there are three input fields: 'UID:' with the value 'FZYUAT7CZTLCUM6GUHEJ', 'Camera Password:' which is currently empty, and 'Camera Name:' with the value 'Camera'. At the bottom of the screen, there are two radio button options: 'Wireless' and 'Wired'. The 'Wired' option is selected, indicated by a blue background behind the text.
