

AirLive **OD-2025HD** has ICR function; it can switch Day/Night mode. However, the ICR malfunction or red image may have caused if user shakes the OD-2025HD body during the installation. If you have any above issue, please see the following steps to solve it:

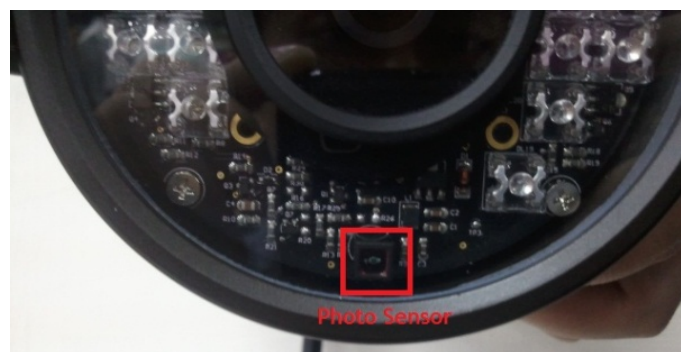

1. Issue Fixed By Manual Operation

Step 1

Please block the photo sensor in front of the cover with your hands. The OD-2025HD will switch the ICR function (Day mode to Night Mode).

(A) Photo Sensor

(B) Please block the photo sensor in front of the cover

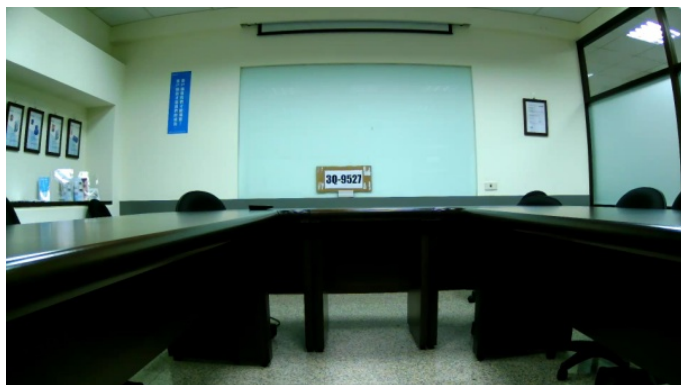

(C) Night mode image

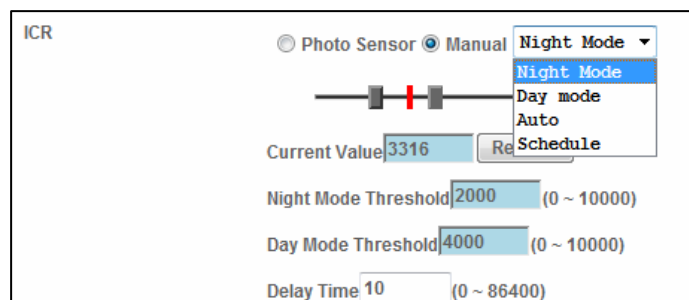

Step 2

Please remove your hands, the ICR will switch again, and the camera image will be normal.

2. Issue Fixed by Camera's ICR Function

User can use ICR function of Camera WEB UI to fix red image issue, please see the following steps to fix it:

Please switch the ICR function as **Night mode to Day mode**, then you will see the normal image.
