O Advanced User: Compared with many	Setting.	
< Back	Next >	Cancel

4. Please set the SSID and Encryption.

In this case, we set the SSID as airlive_AP and the Encryption as AES.

Set Wizard	
Wireless Network Property Setting AP the mode parameter.	
Network Name(SSID): airlive_AP The SSID can be discovered by network sniffing. By default, the SSID is part of the packet header for every packet sent over the WLAN. Encryption: AES Wired Equivalent Privacy - makes 802.11b wireless LANs more secure. WEP is a protocol that adds security to wireless local area networks (WLANs) based on the 802.11b standard.	
< Back Next > Cancel	

5. Please set the key of Encryption, the length is 8-63 bits.

The page will show the settings of SSID and key.
 Please click the "Next" button.

Set Wizard

< Back	Next >	Cancel

8. The page will show the settings of SSID and key and the internet connection. Please click the "Finish" button.

Set Wizard	
Finish:	
Confirms the parameter.	
Network Name(SSID) : airlive_AP	
Network Key : Network Key : 12345678	
The internet connection : WAN Miniport (PPPOE)	
Finish	

Now, we have finished all settings of wireless network card.
 It could send wireless signal and share internet connection to wireless client.

- For Client side, we will show the steps about connecting the laptop to WL-1700USB:
- 1. Please use "the Refresh network list" function to search the wireless network. Then please choose the SSID of WL-1700USB and click the "Connect" button.

^{((†))} Wireless Network Connect	ion
