**Q: How to Receive WL-1000/1200CAM's Video Stream on Android Phone/Tablet?**

A: For doing this, you need a MJPEG player for receiving the video stream and playing it on your screen. In this guide, we will take mLiveCams (Android APP) for demonstrating.

1.) **Download the APP from Market and launch it.**

2.) **Select the "Add/Search Camera" tab.**

3.) **Click on "Add Camera".**

4.) **Enter those parameters shown on the screen:**

5.) **Then, click on "Add" for saving the configuration.**

6.) **Go back to top and click on LIVE VIEW for receiving the**

video.
