

Q: How to solve as the CamPro Professional can't run on the PC after the normal installation procedures?

A: Sometimes, CamPro Professional can't run on the PC after the normal installation procedures, it may be caused by customer's system configuration , Windows unknown updates or it could be caused by any unexplained situation. Anyway, you can follow below procedures to initialize CamPro Professional server manually.

1.>If you can't find CamPro Professional from Windows Services after the normal installation procedures, as shown below snapshot. It means that CamPro Professional server has not been initialized successfully.

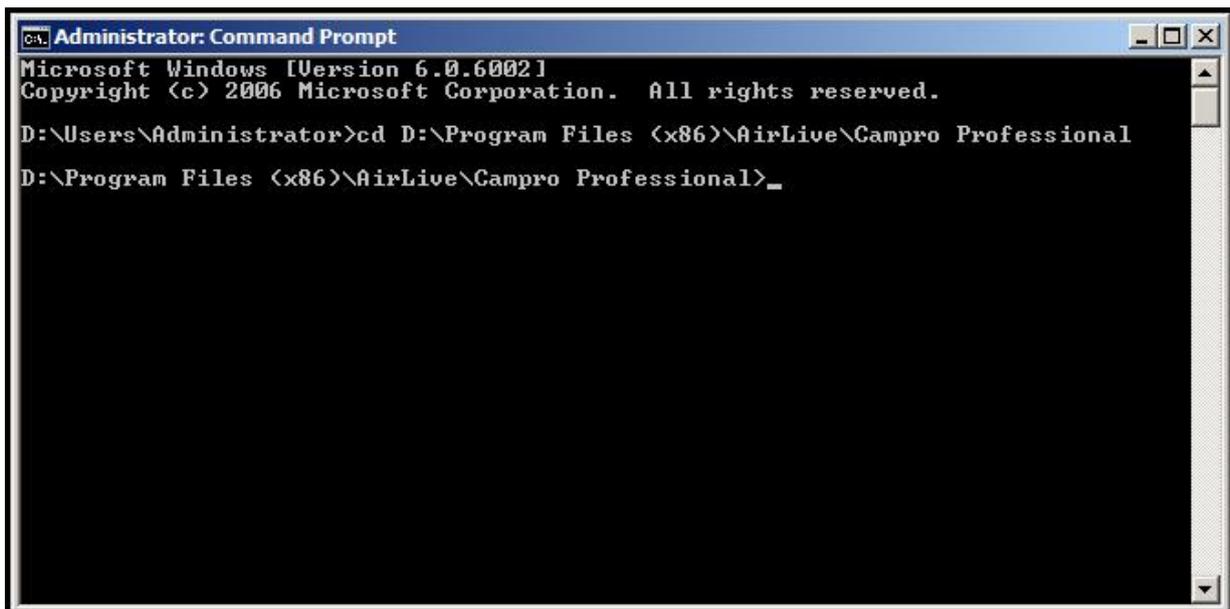

- 2.>To initialize CamPro Professional server manually, please open Windows Command Prompt and change to the directory which CamPro Professional was installed.
(e.g : C:\Program Files (x86)\AirLive\Campro Professional or ...)

```
Administrator: Command Prompt
Microsoft Windows [Version 6.0.6002]
Copyright (c) 2006 Microsoft Corporation. All rights reserved.

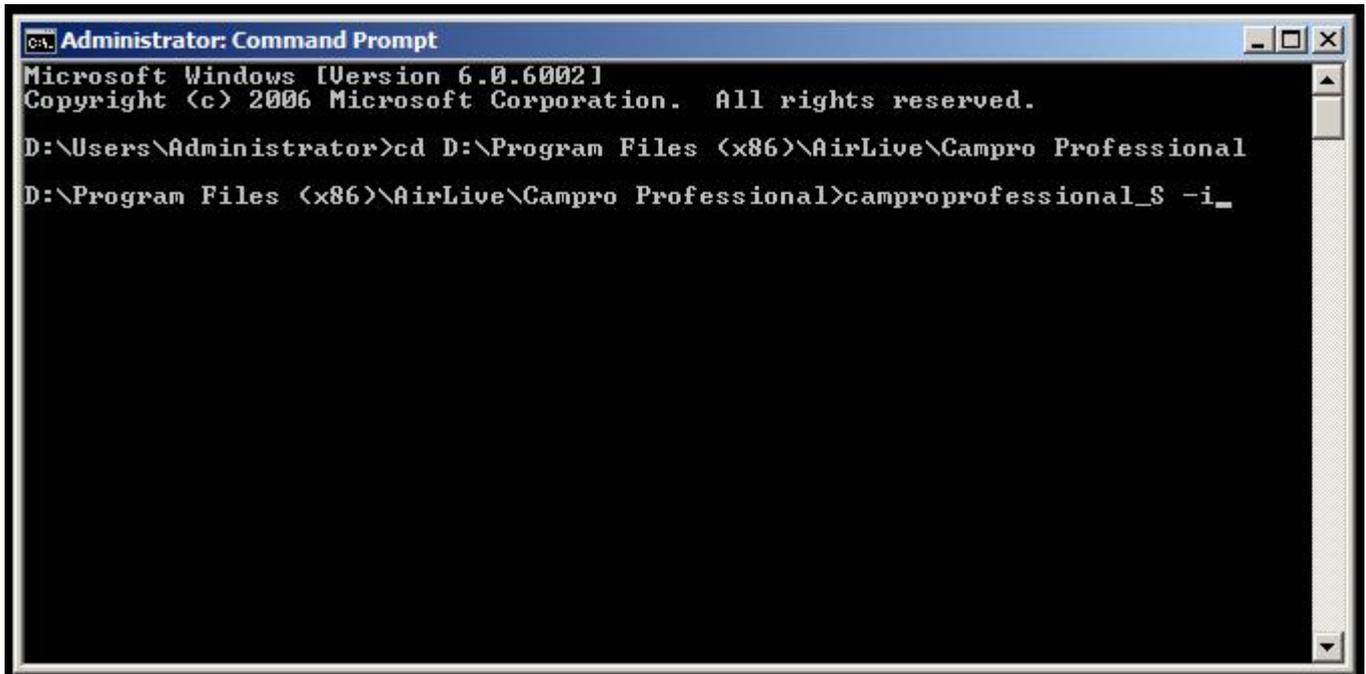

D:\Users\Administrator>cd D:\Program Files (x86)\AirLive\Campro Professional
```

```
Administrator: Command Prompt
Microsoft Windows [Version 6.0.6002]
Copyright (c) 2006 Microsoft Corporation. All rights reserved.

D:\Users\Administrator>cd D:\Program Files (x86)\AirLive\Campro Professional
D:\Program Files (x86)\AirLive\Campro Professional>_
```

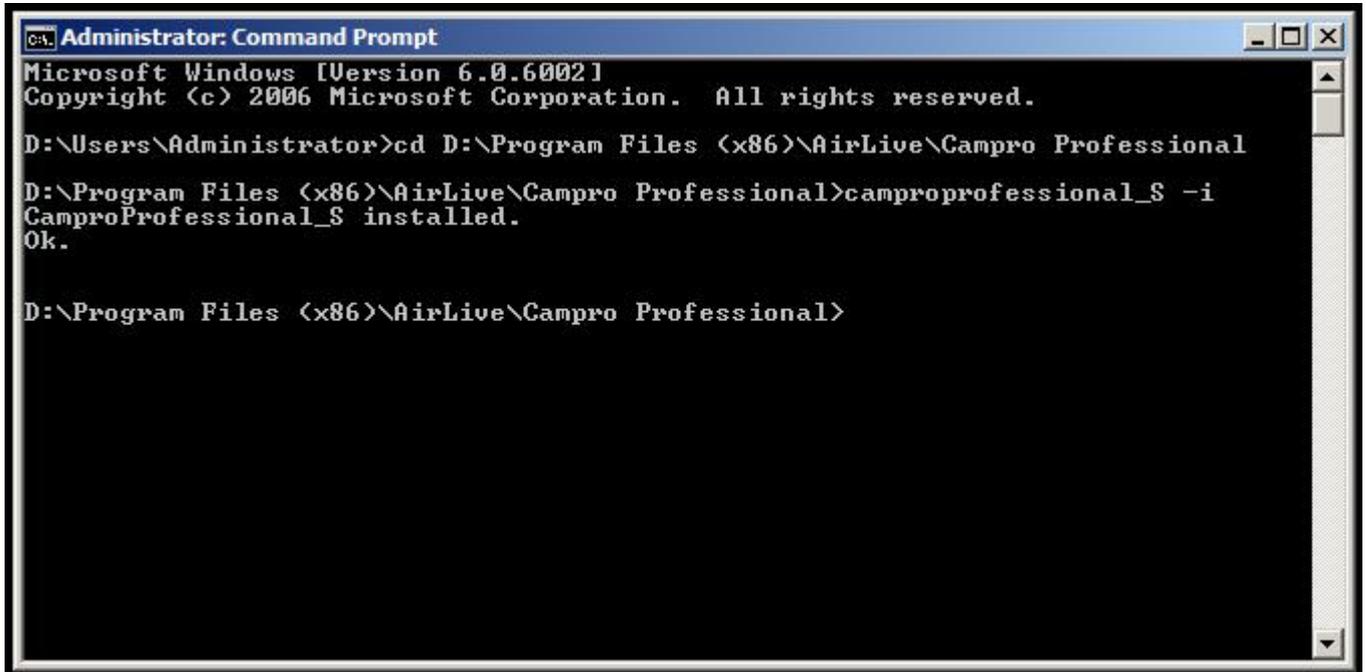

3.>To initialize CamPro Professional server by typing the command “camproprofessional_S -i”.

```
Administrator: Command Prompt
Microsoft Windows [Version 6.0.6002]
Copyright (c) 2006 Microsoft Corporation. All rights reserved.

D:\Users\Administrator>cd D:\Program Files (x86)\AirLive\Campro Professional
D:\Program Files (x86)\AirLive\Campro Professional>camproprofessional_S -i_
```

4.> CamPro Professional server has been initialized now.

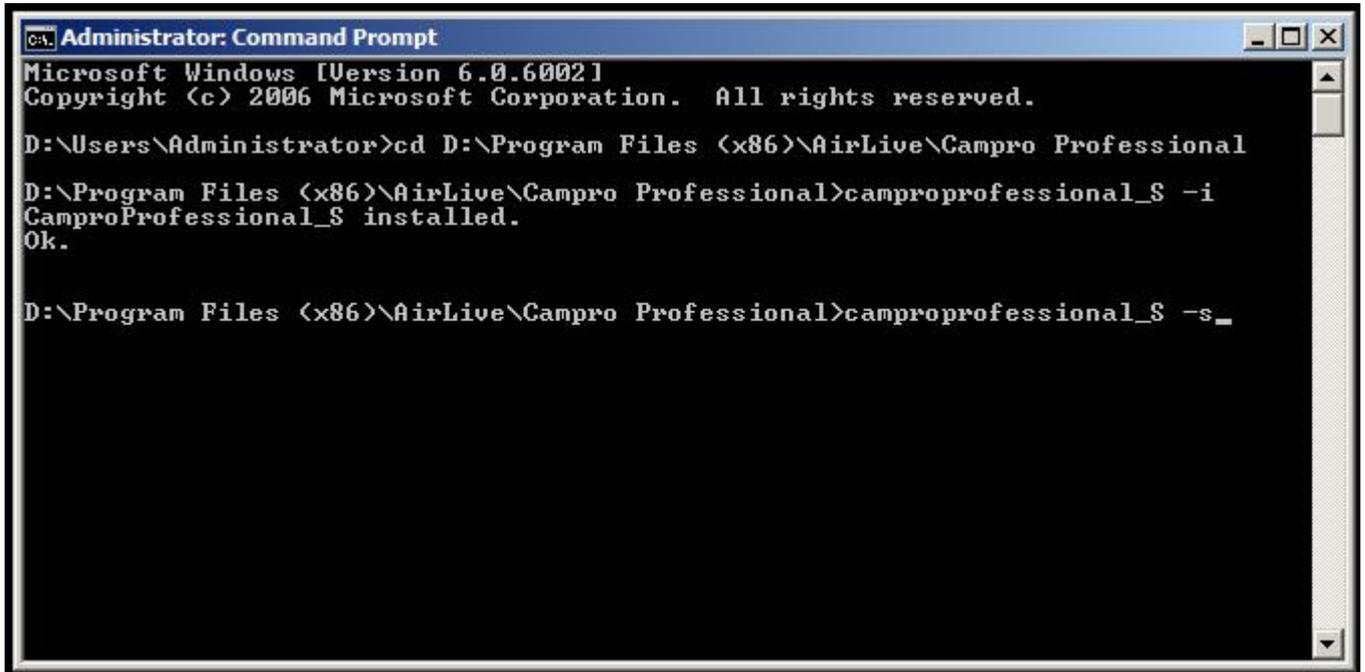

```
Administrator: Command Prompt
Microsoft Windows [Version 6.0.6002]
Copyright (c) 2006 Microsoft Corporation. All rights reserved.

D:\Users\Administrator>cd D:\Program Files (x86)\AirLive\Campro Professional
D:\Program Files (x86)\AirLive\Campro Professional>camproprofessional_S -i
CamproProfessional_S installed.
Ok.

D:\Program Files (x86)\AirLive\Campro Professional>
```

5.> Then, to start the CamPro Professional server by typing the command
“ camproprofessional_S -s ”.

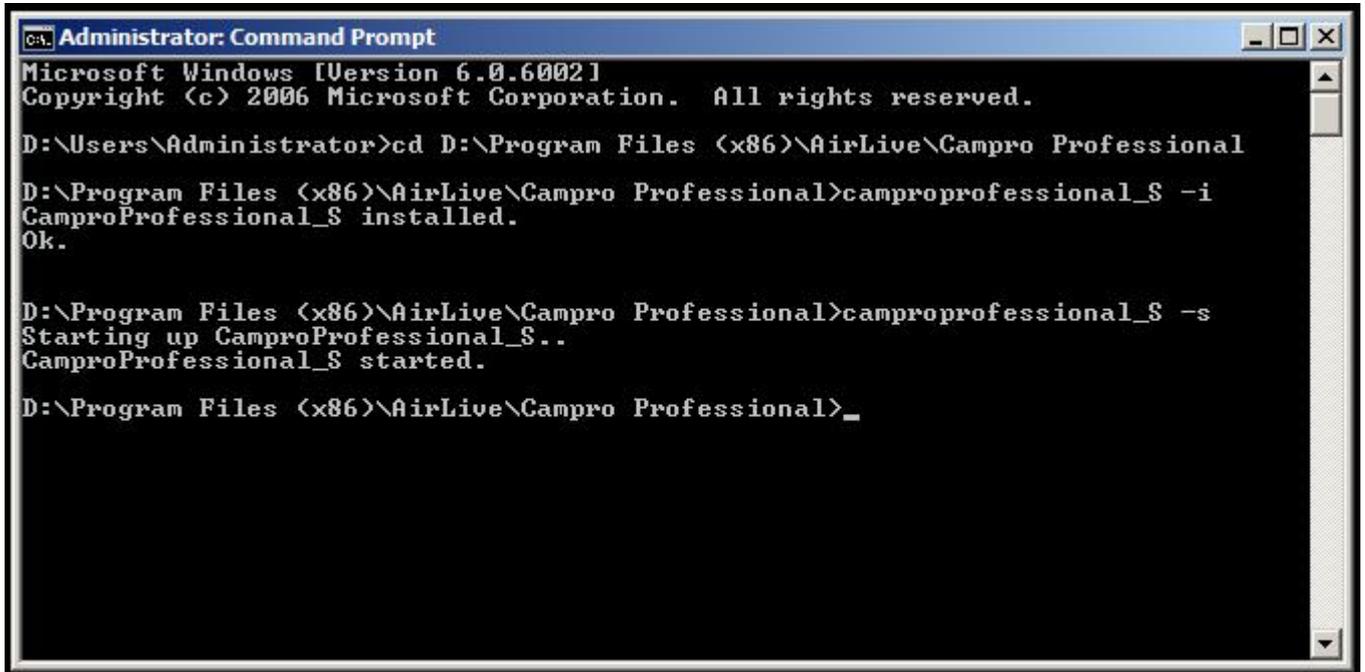

```
Administrator: Command Prompt
Microsoft Windows [Version 6.0.6002]
Copyright (c) 2006 Microsoft Corporation. All rights reserved.

D:\Users\Administrator>cd D:\Program Files (x86)\AirLive\Campro Professional
D:\Program Files (x86)\AirLive\Campro Professional>camproprofessional_S -i
CamproProfessional_S installed.
Ok.

D:\Program Files (x86)\AirLive\Campro Professional>camproprofessional_S -s_
```

6.> CamPro Professional server has been started now.

```
Administrator: Command Prompt
Microsoft Windows [Version 6.0.6002]
Copyright (c) 2006 Microsoft Corporation. All rights reserved.

D:\Users\Administrator>cd D:\Program Files (x86)\AirLive\Campro Professional
D:\Program Files (x86)\AirLive\Campro Professional>camproprofessional_S -i
CamproProfessional_S installed.
Ok.

D:\Program Files (x86)\AirLive\Campro Professional>camproprofessional_S -s
Starting up CamproProfessional_S..
CamproProfessional_S started.

D:\Program Files (x86)\AirLive\Campro Professional>_
```

7.> Finally, you can check Windows Services that CamPro Professional server was installed & initialized successfully.
