Q : How to upgrade the latest firmware of NVR 8/16 ?

A :

1.> Download the latest F/W of NVR 8/16 as below links:

(Note: don't decompress the F/W after download)

NVR 8 F/W: http://fs.airlive.com/firmware/Airlive108v172A30053251.tar.tar

NVR 16 F/W: http://fs.airlive.com/firmware/Airlive116v172A30053251.tar.tar

2.>Login the Web-server of NVR 8/16 , Click on "System Option" >> "Maintenance" .

3.>Select the F/W to be upgraded by clicking the "Browse" button.

VVR Setup	Click "Restart" button to restart NVR
System Configuration	Restart
Event Configuration	
Recording Configuration	Backash Canada
System Options	Restart Camera
Device Information	Select a camera below to perform a restart
System Logs	Restart
Maintenance	
Disk Status	
	Upgrade NVR Firmware
	Locate the new firmware and perform the upgrade (Current Firmware Version: 1.6.0A.30028874)
	Specify the firmware file: D:Use/Data/DesktopWVF Browse and click Upgrade
	*** Note ***: Please DO NOT power off the system during the firmware upgrade process. You will be notified once the upgrade process is complete
	Backup NVR's Setting
	Backup the configuration to a local hard disk
	Destruct
	Bachup

4.>Click the "Upgrade" button to execute the firmware upgrade.

5.>The system will be restarted after the upgrade procedure was completed.

Note :

Since the EventDB structure of this F/W was improved, in order to improve the system performance, you are suggested to re-format the hard drives after the NVR8/16 was upgraded with this latest F/W.

Bugs Fixed

- EventDB has wrong data after a long time processing.
- IE8 update firmware fail problem
- Increases stack size of memory to avoid System crash. (disconnecting issue).
