Please show me how to setup a Virtual Server with WL-5460AP .

- 1.> Connect your PC to LAN1 of WL-5460AP via Ethernet cable.
- 2.> Please make sure your PC's IP is in the same subnet as the AP (i.e.192.168.100.100 subnet mask : 255.255.255.0).
- 3.> Open the web browser and enter http://192.168.100.252/.

4.> Choose the gateway mode as shown below :

Air Live	WLAN Acce	<b>SS PC</b>	ot Other
	Wireless Mode		
i page is used to ip different	Can	84. 1	August Data
less mode:	C Client	Botim	Access Point.
	C Bridge	Setun	Bridge
	○ WDS Repeater	Setup	WDS Repeater.
	C Universal Repeater	Setup	Universal Repeater.
	C WISP	Setup	WISP.
	C WISP + Universal Repeater	Setup	WISP + Universal Repeater.
		Setup	AP + GATEWAY.

5.> Press the Setup button for detail setting.
