

True IPCamera Plug n Play

The true ipcamera plug and play support in GW300R and GW300NAS. This function allows user to plug 4 ipcameras into router without any configure and link to internet. Support AirLive camera upto 4 wireless or wire cameras.

The screenshot displays the web management interface of an AirLive GW-300R router. The top navigation bar includes the 'ADMINISTRATOR's MAIN MENU' with links for Status, Wizard, Advanced, Logout, and Language (English). Below this, a secondary menu highlights 'BASIC SETTING', 'FORWARDING RULES', 'SECURITY SETTING', 'ADVANCED SETTING', and 'TOOLBOX'. The left sidebar contains a tree view with options: Virtual Server, Special AP, Miscellaneous, and IP CAM (which is currently selected). The main content area, titled 'IP CAM List', features a table with the following data:

IP Address	Port	Host Name	MAC Address	Description	Status	Edit
192.168.2.201	8080	AirCam POE-250H	00-4F-70-20-0A-E5	classroom	<input checked="" type="radio"/>	<input type="button" value="edit"/>

Below the table, there are 'Save' and 'Refresh' buttons.
