

## NAS-235

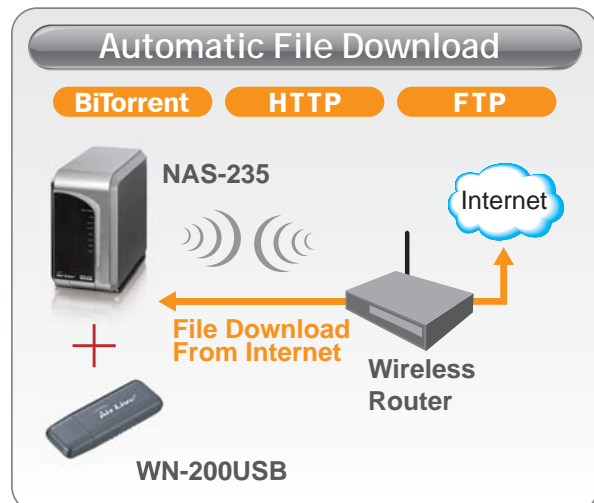

### The AirLive 2Bay DiskMaster NAS-235

The NAS-235 inserts Terabytes of storage space into your network without the cost, space, and maintenance hassles of a full-fledged file server. The NAS-235 provides solid data transfer performance for multiple client connections. And you can add as many NAS-235 to your network as you like. Compared to using a standard PC as a File Server, the NAS-235 offers lower cost, easier management, and increased reliability. Moreover, NAS-235 supports WN-200USB for changing it into wireless, and hence avoids the annoying cabling issue.

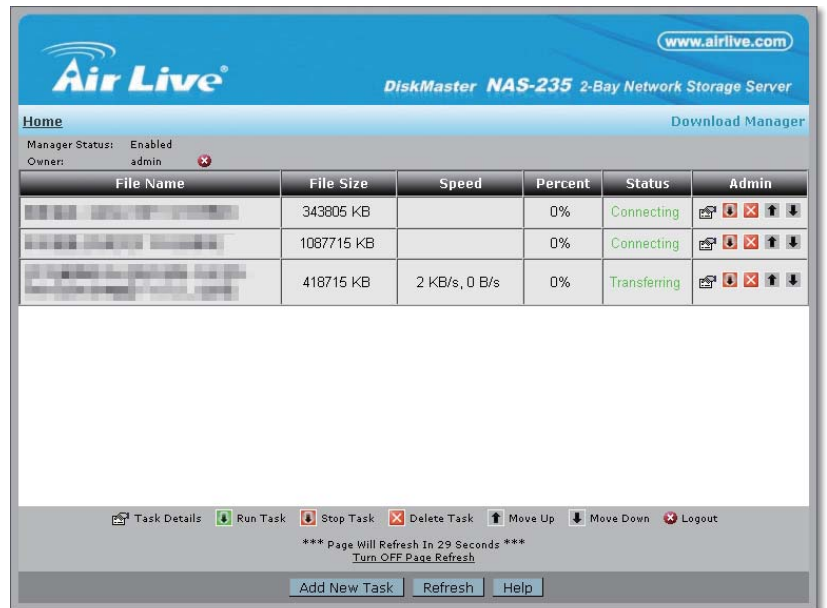

### Share 3.5 inch SATA or IDE Drive Wirelessly

With WN-200USB, NAS-235 become a wireless file server with up to two 3.5" SATA Hard Drives. Therefore, you can install any 3.5" SATA Hard Drive and share it instantly on the network. Users can use My Network Place to access the Hard Drive. Even set it as a network Drive. So you can save or read files directly. The NAS-235 can set username and password to limit access only to certain users. Best of all, Internet user can access the device through standard FTP client.

## BitTorrent Client

Built-in Bit-Torrent download engine, this engine allows you to download the legally shared contents on the Internet without leaving your PC power-ON all the time.

## Perfect Companion to Digital A/V Streaming

The SATA II throughput of the NAS-235 makes it a perfect companion for your A/V Streaming Media Player. You can simply download any audio and video clip directly into the NAS-235. Then your AirMedia-350 can play the audio/video from NAS-235 directly. Besides, NAS-235 also supports iTunes and MP3 broadcast server for streaming your music over your network

## USB 2.0 Ports

If you want to share your USB storage or Disk Enclosure quickly, you can use the built-in 2 x USB 2.0 ports. Simply connect your USB pen drive or Disk Enclosure, and then the NAS-235 can share the data on the network using Samba function.

### Specifications

#### Hardware

##### CPU

- 500MHz

##### Memory

- 128M Bytes SDRAM

##### Flash

- 16M Bytes flash memory

#### LAN

- Support Giga LAN, auto-negotiation, auto MDIX, Jumbo Frame

#### HDD I/F

- Support two SATA –II HDD I/F

#### RAID

- Signal Disk Mode

- JBOD/LVM
- Raid 0
- Raid 1
- Auto rebuilding

#### **LED**

- 8 LED

#### **Switch**

- Power on/off switch

#### **System**

##### **Networking**

- TCP/IP
- Apple Talk
- HTTP
- HTTPS
- FTP
- FTPS

##### **File Sharing Protocol**

- CIFS/SMB over TCP/IP
- NFS
- Apple Talk

##### **Network Client**

- Windows 98/ME/NT/2000/2003/XP/Vista/XP
- Mac OSX
- Linux
- Unix

##### **File System**

- Journaling file system XFS (for internal HDD)
- FAT16/32 (for USB device)
- NTFS Read (for USB device)

##### **Disk Management**

- Format:
  - Format/Prepare internal HDD (for XFS)
  - Format/Prepare/Partition USB device (for FAT32, can partition up to 4 partitions)
- Disk Scan (Manual/Schedule)
- Disk S.M.A.R.T (Manual/Schedule)
- Disk Usage (Status Bar)
- HDD Standby Mode
- Disk Full Alarm

##### **User Management**

- User account: 255
- Disk Quota by user
- Password authentication

##### **Group Management**

- Group account: 255
- Group member management
- Admin group for administrator

##### **Share Folder**

- Share folder: 255
- Share folder access right management (by group)

##### **Log**

- System/Event Log
- Disk Log

##### **Language Support**

- Unicode support for CIFS
- Multiple language support for FTP/HTTP

##### **System Function**

- E-Mail Alert
- Date/Time/Daylight
- NTP

##### **Vista Support**

- LLTD
- PnP-X

##### **Printer Server**

- Network printer sharing
- IPP (Internet print protocol)

##### **Media Function**

- Media Server (UPnP/DLNA)
  - Photo
  - Audio
  - Video
- iTunes Server
- Music Broadcast

##### **Backup**

- Data backup without utility on PC
  - Full Backup
  - Incremental
  - Synchronize

- Server Backup/Client Backup (Schedule)
- Drive Backup (Internal HDD vs. USB HDD)
- UP to 10 backup jobs
- Backup with Compress/Restore
- Device backup (Drive to Drive)
- Easy use backup utility

#### **Download Manager**

- BT (P2P)
- FTP
- HTTP
